EXPERIENCE

WRTH

Remote

Lead Engineering Manager (2026 - Present)

- **Led 0-to-1 product and engineering delivery** of WRTH's Store/POS experience from problem definition through its **first live transaction**, shaping merchant checkout, pricing/tax/fee behavior, inventory, orders, receipts, and launch acceptance criteria.
- **Owned production stabilization** after launch, shipping **8 post-sale fixes within 24 hours**, cash sales and mobile checkout repairs, and pricing changes that made **1,505 inventory items sellable** while preserving storefront privacy.
- **Owned end-to-end product definition** for WRTH Event commerce, mapping organizer, vendor, and merchant journeys across onboarding, permissions, inventory, payments, and readiness; drove Dev acceptance through a **successful terminal payment**.
- **Defined the product and data model** for Oracle AI Pricing and NFC/blockchain authentication, including confidence-scored valuation, user-facing price ranges, tap-to-authenticate flows, and launch requirements.
- **Defined core Store/POS product policy** across fees, tax, tender types, receipts, roles, and hardware, translating business rules into implementation requirements while balancing merchant UX, payment safety, and launch readiness.
- **Drove cross-functional product alignment** across founders, engineering, and GTM, resolving competing scope and monetization decisions across **five product lines** and turning conflicting requirements into clear launch priorities and onboarding materials.

Microsoft

Redmond, WA

Product Manager (June 2024 - August 2024)

- **Drove delivery** of a self-serve rollout-policy product and configuration pipelines that cut manual engineering work by **60 hours/month**; defined charter, OKRs, dependencies, and release milestones.
- **Led discovery across 40+ stakeholder interviews**, turning requirements into roadmaps, user journeys, migration playbooks, rollout templates, and execution plans.

Product Manager (June 2023 - August 2023)

- **Designed a system-freeze scheduling tool** to prevent releases during high-traffic, low-staff windows; authored a **30-page product specification** using conflict and resource-utilization data to set rollout priorities.
- **Drove cross-functional alignment** across product, design, data, and engineering through weekly status updates, action-item ownership, risk tracking, and requirement reviews.

Software Engineer & Product Manager (June 2022 - August 2022)

- **Built React and Python components** for an automated fact-verification app; led **3 user-testing sessions** and backlog refinement that improved verification accuracy from **76% to 92%**.

SLAD LLC

Houston, TX

Founder (June 2023 - January 2026) | [Instagram](#)

- **Owned end-to-end product launches** across design, supplier coordination, inventory planning, e-commerce operations, customer support, and performance tracking, balancing creative direction with day-to-day business execution.
- **Built Power BI dashboards** and ran creative and paid-social experiments to improve targeting, driving **807K+ impressions**, **113% Instagram follower growth**, and **147% QoQ growth** in website sessions.

EDUCATION

Northwestern University, 2025

Evanston, Illinois

B.S. in Computer Science | GPA: 3.6/4

Houston City College, 2021

Houston, Texas

A.S. in Science, Highest Honors | GPA: 3.99/4

LEADERSHIP

The Fraternity of Phi Gamma Delta | President, Treasurer (March 2022 - June 2025)

- **Led a 50+ member chapter**, stewarded a six-figure annual budget, and **doubled revenue in one year** through budget redesign, fundraising, and accountability systems.

Society of Professional Hispanic Engineers | Secretary, Mentor (September 2021 - June 2025)

- **Mentored 8 underrepresented students** through recruiting and interview prep, supporting placements at Microsoft, Google, Goldman Sachs, and Bloomberg.

SKILLS

Product & Analytics: Jira, Figma, Power BI, Tableau, Vertex AI

Technical: Python, JavaScript, SQL, PostgreSQL, Supabase, Stripe, REST APIs, AWS, Azure, DataBricks, CI/CD

Additional Engineering: Java, C++, HTML/CSS, MySQL, Docker, Git/GitHub, TensorFlow
